Dmitrii Shatokhin

Front End Architect @ Support Partners | Software Engineer, Open-source enthusiast

Warsaw, Mazowieckie, Poland

Summary

Hi there!

I'm Dmitrii, a versatile software engineer and architect with over a decade of experience. My journey in tech started with C, C++, and Python, and has evolved to encompass web development, AI, and data science. Inspired by Robert Heinlein's quote, "Specialization is for insects," I love exploring diverse technologies and solving complex problems.

When I'm not coding, I cherish time with my family, creating music, and dreaming about space adventures. Feel free to connect if you want to chat about tech, science, or just share a laugh. Cheers!

Experience

Support Partners

Front End Architect

January 2022 - Present (2 years 7 months)

Warsaw, Mazowieckie, Poland

As a Front End Architect, I play a key role in planning and developing product roadmaps, actively participating in defining and implementing the project architecture (but I also sometimes develop the backend part). I personally handle the selection of technologies and the writing of critical code, as well as dividing overall tasks into subtasks and coordinating developer activities. I contribute significantly to the development, often taking on the most complex tasks, and provide technical leadership and mentorship in the team. Additionally, I am involved in writing and updating technical documentation, ensuring clear understanding and adherence to design decisions.

Graph

Senior Frontend Developer

January 2021 - January 2022 (1 year 1 month)

St Petersburg, St Petersburg City, Russia

I was engaged in frontend development for various projects and systems.
I improved and optimized existing projects by proposing new solutions.
Additionally, I was involved in mentoring.

GeekBrains

Teacher of the course "Python Developer"

November 2017 - December 2020 (3 years 2 months)

actiTIME

Senior Frontend Engineer

August 2020 - November 2020 (4 months)
