Engineering leader with 13+ years of experience building scalable systems and leading technical teams. Achieved **2 successful exits**: autonomous vehicle startup acquired by [Uber](#) (2018) and part of Graph acquired by [Microsoft/ Support Partners](#) (2021). Currently Engineering Lead at FunnelFox, driving revenue-generating products for top mobile apps. **Founder** of [Persevie](#), creating high-performance open-source tools used by **Fortune 500** companies. Expertise in architecture design, team leadership, and delivering measurable business impact.

Work Experience

Engineering Lead (Staff/L5)

Nov 2024 - Present

[FunnelFox](#)

- Architected and delivered critical features for the no-code web-to-app funnel builder, enabling non-technical teams to launch revenue-generating funnels in under 1 day.
- Redesigned core payment infrastructure and checkout flows, improving conversion rates by **30%+** and increasing LTV by **20%+** through advanced monetization features.
- Led engineering initiatives that influenced the company's business model evolution, expanding platform capabilities to support 3,300+ active web funnels across top-tier mobile apps.
- Restructured development processes, established engineering standards, and implemented scalable architecture patterns that reduced deployment time and improved system reliability to 99.9% uptime.
- Developed real-time analytics and A/B testing infrastructure, empowering growth teams to run weekly experiments and achieve **80%+ ROAS** improvements for key clients.

Technical Lead (Distinguished/L7)

Jan 2021 - Present (Contract)

[Kotiki](#)

- Defined technical strategies, led architecture design, and implemented core solutions.
- Supervised development teams, ensuring code quality and project alignment with business goals.
- Delivered high-performance, scalable systems for major clients like [Microsoft](#), [Support Partners](#).
- Mentored team members and drove best practices across multiple projects.

Software Architect (Principal/L6)

Jan 2022 - Jun 2024 (Full-Time); Jun 2024 - Sep 2024 (Contract)

[Support Partners](#)

- Contributed key features for [Microsoft](#), [Adobe](#), [Disney](#), [MWG](#), and [BBC](#), driving business success.
- Led re-engineering, boosting performance by **9.5x** and reducing memory consumption by **4x**.
- Standardized development processes, introduced best practices and code quality controls, and improved the overall code culture.
- Developed a modular, scalable uploader for large digital assets, integrating advanced security features and real-time feedback.
- Developed innovative [Support Partners](#) products for [NAB Show](#), generating significant interest from major media organizations.

Engineering Lead (Distinguished/L7)

Jan 2021 - Jan 2022 (Full-Time)

[Graph](#)

- Built the service and achieved an **exit** via acquisition by [Support Partners](#) and [Microsoft](#).
- Developed products for the London government to support their digital initiatives.

Early Career (2014-2021)

Started professional career in 2014 after freelance work, holding Software Engineer positions at [MSTU](#), [MMK](#), [Mail.ru](#), Advance Engineering, [GeekBrains](#), and [actiTIME](#), developing enterprise systems, educational platforms, and consumer applications. In 2017, co-founded autonomous vehicle startup as Principal Engineer, developed LiDAR software and built physical prototype for self-driving cars, achieving **exit via acquisition by [Uber](#) in 2018**.

Projects

[Grimoire CSS](#)

A magical CSS engine for all environments.

- A self-sufficient engine that requires no bundlers, preprocessors, optimizers, or deduplicators - everything is handled internally and efficiently.
- Generates CSS 5x faster and 28x more efficiently than Tailwind CSS v4.x, while producing real, fully optimized styles.
- A native parser that supports any source file out of the box, in both filesystem and in-memory modes; available as a standalone binary, a Rust crate, and an npm package.
- Honors the CSS cascade, optimizes rules, applies necessary prefixes, and ensures full browser compatibility via your `.browserslistrc`.
- A powerful module compliant with CSS Color Module Level 4, enabling precise and high-performance color manipulations. Also available through the public API as a standalone color toolkit.

[Statemanjs](#)

Proper state manager for JavaScript

- Outperforms [Redux](#) and [MobX](#), especially with large datasets.
- Used in projects for [Microsoft](#), [Adobe](#), [Disney](#), and [BBC](#).
- Organically grown to 30,000+ downloads per month without any formal promotion.

[EBEXJS](#)

Event Bus Executor for JavaScript applications

Volunteer Experience

Founder | Teacher

Jan 2017 - May 2017

RoboCoders

Founder and leader of RoboCoders, a free coding club for children (8-12yo).

Core Skills

JavaScript, Python, Rust, Go, AI/ML, Architecture/Systems Design, Infrastructure

Education and awards

Bachelor of Architecture

Sep 2012 - Jul 2016

[Magnitogorsk State Technical University named after G.I. Nosov \(MSTU\)](#)

Senior Member [IEEE](#)

Jul 2024

Only 10% of IEEE's more than 450,000 members hold this grade.
